

# CASE STUDY

**Project:** Resiblock- All Around The World  
**Client:** Architects, Civil Engineers, Local Authorities  
**Contractor:**  
**Paver Type:** CBP, Natural Stone Setts and Flags,  
Permeable Paving  
**Area:** From 100m<sup>2</sup> to 500,000m<sup>2</sup> and beyond  
**Sites:** Port of Salalah, Oman. Ras Laffan Container Port,  
Qatar. Heathrow Airport, London. O2 Arena, London.  
Disneyland, Hong Kong and many, many more.  
**Product:** Resiblock '22', Resiblock '22' A.F, Resiblock Envirofix, Resiblock Resiecco,  
Resiblock Resifix, Resiblock Ultra Matt  
**Date:** April 1993 – April 2018

## The Site

From Portland, Oregon, USA to Christchurch, New Zealand, via Kobmagergrade, Denmark, Port of Monrovia, Liberia, Somerset East, South Africa, Sapporo Airport, Japan and almost everywhere in between, Resiblock has truly been the "World's Favourite Paving Sealer." Utilised at port pavements, aircraft aprons, sports stadia, entertainment venues and council run schemes, we at Resiblock have provided sealing solutions for literally millions of square metres.

## The Challenge

Over the past 25 years Resiblock has encountered a wide range of challenges when it comes to stabilising and protecting Paving. Whether it be the potential for paving failure caused by structural destabilisation under heavy duty traffic, possibility of fuel infiltration, erosion of jointing medium through environmental factors and cleaning regimes or food and drink staining, Resiblock has always risen to the task set before them by the paving industry. Even the extreme weathers of Qatar, Oman and Liberia have not affected Resiblock's ability to seal, stabilise and protect paving.

## The Solution

Resiblock's Commercial Range has provided economical solutions for all of the above challenges through specialist products Resiblock '22', Resiblock '22' A.F and Resiblock Ultra Matt, Resiblock Resiecco and the patented proprietary self-binding jointing sand Resiblock Resifix Commercial. These products have all been specially manufactured to ensure paving protection, stabilisation and where required colour enhancement. Resiblock – sealing, stabilising, protecting paving The World Over!

## Benefits at a Glance:

- One pack material
- Easy application
- Prevents sand erosion from paver joint
- Prevents the ingress of water and fuel infiltration to the sand laying course
- Maintains structural stability under heavy duty trafficking
- Elastomeric bond works in tandem with paver system
- Gives resistance to food and drink stains
